

## Solution Architect - Celenia Software NA

North America - Atlanta Georgia

### Summary...

Responsible for performing discovery, analysis and design to determine and document scope, approach, and technology for the overall solution, and to further coordinate through to completion.

### Details...

Celenia Software is expanding in North America, with headquarters established in Atlanta, GA and a sales office in Redmond, WA. We are looking for qualified Solution Architects to join our team, to produce cost effective and robust overall solution designs within agreed frames of purpose, quality, time, and budget. The role of a solution architect is to work closely with the customer to determine and document the scope of work, and to further supervise additional team members in producing the work, and managing the project to completion. This role is responsible for the overall technical/solution design, to suggest and agree to changes in conceptual designs with customer, and to evaluate impact of those changes on the conceptual design and budget.

### We are interested in individuals who have...

- 4+ years experience working with Microsoft Dynamics NAV and/or Dynamics AX.
- Bachelor's degree or equivalent technical qualification, with 6-10+ years experience in information systems development and/or ERP business consulting.
- Proven experience evaluating customer requirements and producing solution documentation.
- Ability to make the overall architectural design on big projects paired with leadership to drive the technical effort across teams, and to translate their knowledge into an overall architectural design on smaller projects.
- Effectively demonstrate knowledge of application development and integration technologies, and experience in selecting appropriate technology in determining fitting solutions.
- Proven knowledge of common business processes together with the ability to learn and understand new uncommon business processes, and to translate this knowledge into a consistent and effective overall solution design.
- Ability to earn the respect of the project team both internally and externally and of management, and to work effectively within regionally and globally dispersed teams.
- Knowledge of business processes and possible solutions in general and communicate effectively in English with MCP consultants and the development team.
- Willingness to travel variable to 50%.

The solution architect reports directly through to the Solution Architect Manager in North America. Preference will be given to candidates with knowledge of Dynamics upgrades, localizations, and ISV product add-on's, as well as strong technical experience and industry solution involvement. Additional experience in application integration, portal and application development, project management, and technology is a definite plus.

Please forward your resume including salary expectations, and any questions to Daryn Terlesky at [dt@celenia.com](mailto:dt@celenia.com). We would like to thank all applicants for their interest in this position however only those selected for interviews will be contacted.
